

MUHAMMAD AWAIS KHAN

Full Stack Web Developer | BS Information Technology Student

awaiskhanniazi2233@gmail.com | linkedin.com/in/awais-khan-9ba71b374 | github.com/Awaiskhanniazi

PROFESSIONAL SUMMARY

Full stack web developer and BS Information Technology student (5th semester, CGPA 3.75/4.0) with hands-on experience building a production-style multi-tenant Point of Sale platform as a startup intern and team lead. Skilled in the React, Node.js, Express, Prisma, and MySQL stack, with practical experience implementing JWT-based authentication, role-based access control, and secure Axios API layers. Comfortable leading small teams, translating business requirements into working modules, and shipping full-stack features end to end.

EXPERIENCE

Full Stack Developer Intern & Team Lead — Primore Technologies

Internship

Project: Multi-Domain Point of Sale (POS) Management System | Team of 3 | Stack: React, Node.js, Express, Prisma, MySQL

- Led a 3-member development team to design and build a multi-tenant, multi-branch POS platform supporting retail domains including pharmacy, grocery, and general retail.
- Implemented secure, token-based authentication (JWT access + refresh tokens) with role-based access control (RBAC) scoped by tenant and branch across Super Admin, Store Manager, Cashier, Inventory Manager, and Accountant roles.
- Built and protected backend REST APIs for authentication, product management, inventory, sales, and accounting modules using Express and Prisma ORM on MySQL.
- Engineered the frontend API layer using a custom Axios instance with request/response interceptors for automatic token attachment, refresh-token handling, and centralized error handling.
- Contributed to core business logic including FEFO (First-Expiry-First-Out) batch allocation for pharmacy inventory, stock movement ledgers, and audit logging for sensitive operations.
- Collaborated on system design covering product, inventory, purchasing, sales, and accounting modules following a modular, service-based backend architecture.

ACADEMIC PROJECTS

Mianwali Green Bus Management System

Semester Project

Stack: HTML, CSS, JavaScript, PHP, MySQL

- Developed a complete web-based transport management system covering routes, buses, drivers, and passenger bookings.
- Implemented secure admin authentication and session management using PHP and MySQL.
- Built a dynamic admin dashboard displaying real-time booking and operational statistics.
- Created full CRUD modules for routes, drivers, and bus management with relational database integration.
- Designed a responsive frontend interface to improve usability and accessibility across devices.

Inventory & Billing Management System

Object-Oriented Programming Project Java

Stack: Java, Java Swing, iText

- Developed a desktop-based inventory and billing management application using Java Swing.
- Implemented shopping cart, billing, invoice generation, and product management functionality.
- Integrated low-stock and expired-product alert system for proactive inventory monitoring.
- Generated automated PDF bills/invoices using the iText library.
- Applied modular object-oriented design principles to improve maintainability and scalability.

EDUCATION

BS Information Technology — University of Mianwali

Expected 2028

- Currently in 5th semester | CGPA: 3.75 / 4.0
- Relevant Coursework: Programming Fundamentals, Object-Oriented Programming, Database Systems, Data Structures

TECHNICAL SKILLS

- Languages: JavaScript, PHP, Java, SQL, HTML, CSS
- Frontend: React.js, Axios (instances & interceptors), responsive UI design, Java Swing
- Backend: Node.js, Express.js, Prisma ORM, PHP, REST API design
- Database: MySQL (relational schema design, CRUD operations)
- Authentication & Security: JWT (access/refresh tokens), RBAC, protected APIs, session management
- Tools & Practices: Git & GitHub, Postman, OpenAPI-style API documentation, modular OOP design
